Electro Mechanical Assembly and Rebuilding

Blanchard Grinding

Grinding and milling equipment to ensure material needs meet or exceed project specifications for thickness, flatness and parallelism.

BLANCHARD rotary surface grinders

- 150 HP Motor 48" Diameter Segmented Wheel
- 96" diameter chuck. Maximum swing - 112"
- 96" diameter chuck. Maximum swing - 112". Ext. 32" Height

BLANCHARD rotary surface grinder

- 75 HP Motor 32" Diameter Segmented Wheel
- 60" diameter chuck. Maximum swing - 72"

THOMPSON reciprocating horizontal surface grinders

- 120" x 36" x 24" capacity
- 180" x 18" x 22" capacity

MATTISON reciprocating horizontal surface grinder

- 96" x 24" x 22" capacity

BROWN & SHARP horizontal surface grinder

- 30" x 10" capacity

HANCHETT vertical end grinder

- 117" x 24" x 19" capacity

Welding and Fabrication

AWS D1.1/D1.4 Certified welders provide the highest quality welds; available 24/7 giving you the confidence that your job gets done on time, every time.

NELSON 4900 stud welder with heavy duty gun capacity for up to 1" diameter

MILLERMATIC with wire feeders

- 350 Mig, 255 Mig and 252 Mig Welders

EITEL 60 ton straightening press. 20 foot table

Hyd-Mech Automatic Mitering Horizontal Band Saw model S-25A max cutting to 27"

Marvel Vertical Mitering Band Saw model 81APC 18" x 20"

10-Ton Conco Gantry Overhead Cranes 6x covering all 60,000 sq feet of plan

Blasting and Coating

Maverick Engineered Products is constantly improving our procedures in order to provide the best quality and service for coating and processing.

BLASTRAC 20" Self propelled 460V three phase shot blaster with BDC dust collector

JBI Paint Spray Booth 40 ft x 20 ft x 15 ft louvered recess ceiling for crane access, full wall filter grid and exhaust system

High Precision Machining and Milling

Maverick Engineered Products offer metal parts processed with in-house precision CNC Machines, which allow our customers to hold tight tolerances even when up against the toughest jobs.

HITACHI SEIKI Horizontal Machining Center HG-630 with Fanuc series 15M control

VICTOR 1640 high speed precision lathe

LEBLOND REGAL Hollow Spindle Lathe

WEBSTER AND BENNETT 60DH VTL

DEZHOU Precision Lathe model CW61180L

TOSHIBA BP-13-P7 CNC planer type horizontal boring mill

INGERSOLL planer type milling machine

CARLTON Model 3H floor type CNC drilling / boring machine

LOUDON planer type milling machine

OKUMA MILAC 80V High Speed Milling Machine /w Fanuc 15M CNC control

OKUMA MC 6VAE High Speed Milling Machine /w OSP5000M CNC control

OKUMA MC 6VAE High Speed Milling Machine /w OSP5000M-G CNC control

K&T Datamill 4 axis CNC horizontal boring mill

CINCINNATI MILLICRON Dynapath Delta vertical milling machine w/ 10VC-1000 Mark Century CNC control

CINCINNATI VERTICAL HYDRO-TEL MILLING MACHINE w/ Siemens System 800 CNC control

FADAL 4020 CNC VMC w/ HS88 control

Shear Blade Grinding and Sharpening

Our Large Thompson and Mattison Reciprocating Surface Grinders afford us the ability to re-sharpen shear blades to like new condition. Blade re-sharpening is a cost-effective alternative to purchasing new blades not to mention a significant time savings. Our in house grinding capabilities extend to 180".

Mav-Grip

Proprietary skid resistant safety coating designed to exceed the most stringent federal, state and local requirements for slip resistance.
